

SHEELA AKSHAR SAKHI

Coimbatore, India | +91 8523066606 | aksharsakhi@gmail.com | Portfolio | GitHub

SUMMARY

Results-driven Computer Science and Cybersecurity student with hands-on experience in software engineering, AI integration, and workflow automation. Developed internal AI assistants (Astra, Rudra, Sara) and tracking systems at Tata Motors. Skilled in full-stack development, network security, and edge computing with a history of hackathon successes.

EDUCATION

B.Tech in Computer Science and Engineering

Amrita Vishwa Vidyapeetham

Aug 2023 – Present

Coimbatore, India

Post Diploma in Cybersecurity

National Academy of Cyber Security

Jun 2023 – May 2024

India

Diploma in Cybersecurity

National Academy of Cyber Security, Coimbatore

Sep 2023 – Feb 2024

India

INTERNSHIP EXPERIENCE

Tata Motors Limited

Engineering Change Management (ECM) Intern

Apr 6, 2026 – Jul 6, 2026

India

- Automating engineering workflows and operational processes to improve efficiency, visibility, and reduce manual effort across teams.
- Developed internal AI assistants including **Astra**, **Rudra**, and **Sara** to support team members with information retrieval, workflow assistance, and productivity enhancement.
- Designed and developed a team performance monitoring application that provides real-time visibility into project progress, task completion, and operational metrics.
- Built an internal work allocation and tracking platform that helps team members identify pending activities, priorities, assignments, and workflow status.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, C++, HTML, CSS

Development: Full Stack Development, REST APIs, Workflow Automation

Cybersecurity: Network Security, Web Security, Threat Modeling

Tools: Git, Linux, VS Code, Burp Suite, Google Analytics

PROJECTS

NutriScan – Nutrition & Fitness App

Python, API Integration, HTML, CSS, JavaScript

2025

- Developed an AI-powered nutrition analysis app using Open Food Facts API for ingredient and dietary analysis.
- Implemented personalized food recommendations based on health profiles and restrictions.

Edge-Based V2X Efficient Traffic Emergency Response Protocol

Python, Edge Computing, Smart Mobility Concepts

2025

- Built an edge-computing-enabled V2X system for emergency vehicle prioritization and automated green corridor creation.
- Implemented route prediction and real-time traffic workflow optimization.

PackTrack – Gamified Habit Tracker

JavaScript, Google Calendar API, Gamification

2023

- Designed a Pac-Man-inspired habit tracker with streaks, achievements, XP systems, and Google Calendar integration.

ACHIEVEMENTS

- Secured 3rd Place in the ValueHealth Hackathon
- Participated in SIH, HackToFuture, and other national-level hackathons
- Completed PG Diploma in Cybersecurity from the National Academy of Cyber Security

LEADERSHIP & ACTIVITIES

- Organized Gaming Ragnarok during Anokha Tech Fest 2024
- Served as Head of Cultural Activities for Gokulashtami 2025
- Participated in Gokulashtami Skit Performance 2024
